Number 27

## Local Legion Holds Memorial Service Sunday

God Attendance And Excellent Addresses by Clergymen

A very impressive memorial service was held at the cemetery last Sunday afternoon under the auspices of the Local Legion.

Members of the Legion assembled at their club rooms and marched in a body to the cemetery where a goodly number of citizens had assembled for the occasion. Rev W B Smith opened the service with prayer after which he addressed the gathering. He said that if those whose memory we were commemorating on this occasion could speak to us he felt sure they would say "We gave our lives without regret for the good of mankind but our work is not finished." They died facing this great unfinished work which was handed on to us to complete at which we should all take up and carry on faithfully until the glory of God is completed and the whole earth shows His handwork.

Taking as his text: "Keep yourselves in the love of God," Rev. J F Cox said that if it were not for the fact that never would have been a Great War or any more wars. To minimize the horror of war the speaker gave figures showing that in the Great War there were thirty million casualties. Some idea of this vast number was impressed on the gathering when Mr. Cox stated that it would take 88 days for that army of casualties to pass a given point, marching in single formation. Sixty thousand Canadians were sleeping in Flanders field, he said, and we are here to pay our respects to those who made such a great sacrifice for us.

Rev J L Cooper took as his text: "And they shall beat their swords into plow shares and their spears into pruning hooks." The speaker pointed out that the fulfilment of this prophesy is in the hands of those living today. To bring it about we must not go forth looking for vengeance but we must follow along the road that makes for peace. If we want a harvest we must sow seeds. If we want peace and goodwill among men, peace cannot be attained by force, or fear, or self interest. We must attain to peace by higher ideals because it is right and because it is part of the religious belief of us all. When there is a real religious revival then peace will be within our grasp. The heart of Christendom must beat in

## Reccliff Girl Was Married in Lethbridge

McKAY—McFADZEN

A quiet but pretty wedding was performed by Archdeacon Swanson on Tuesday, September 3rd, at St. Augustine's church, Lethbridge. Miss Jean McFadzen, of Redcliff, became the bride of Mr. James McKay of Foremost. Mr. Edward Fisk supported the groom and Miss Ethel Allan acted as bridesmaid. The bride was prettily dressed in a sand georgette frock trimmed with blue and wore a hat to match. Mr. and Mrs. McKay spent a short honeymoon trip in Lethbridge guests at the Marquis hotel. They expect to reside in the city.

## Good Shows Coming To Cameo Theatre

Fame and popularity are all right in their places, but there is such a thing as going too far and ruling one's best th, work and digestion with riotous living. An instance of this was Taran, Ken Maynard's horse and pal, who they were making "Cayenne" Kew's latest western picture for the picture to be shown in the Cameo next Monday night.

"Cheyenne" was made at Cheyenne, Wyoming, during the thirty-second annual Pioneer Days Rodeo and roundup, which served as a background for the motion picture. If you are a fan of a baseball fan, don't miss Richard Dix in "Warning Up" this afternoon picture which comes to the Cameo next Thursday. Dix comes in this story which from all accounts, ranks along side of "The Quarterback," one of his best. In "Warning Up" he is the same hilarious, irreverent Dix but this time his foe is in the pitcher's box.

## WHEAT CROP OF CANADA PUT AT 239,792,000 BUSHELS

The government crop report issued by the Dominion bureau of statistics estimates the wheat crop for all Canada at 239,792,000 bushels. The crop last year was 263,776,000 bushels, which was a record crop for this country. The estimate of the three prairie provinces is 229,471,000 bushels. Last year the prairies produced 244,598,000 bushels. This year's is the smallest since 1914, but the quality is much better.

Mr. T A Coyle of Medicine Hat died suddenly last Wednesday.

time with that peace which peace cannot be attained by force, or fear, or self interest. We must attain to peace by higher ideals because it is right and because it is part of the religious belief of us all.

During the service a number of familiar hymns were sung. After the service wreaths were placed on the graves of the following comrades: Corb P E Oakland, John Kitchen, Private Lamont, A McFadzen

## To Try Formation of United Europe

Pan-Europe was born last Tuesday. Premier Briand of France successfully gave to the vibrating light of Geneva his journey's project to form the European states into a great confederation. Twenty-eight representatives of European countries gathered for the birth day. Meeting under the chairmanship of premier Briand they decided they should attempt to bring into force the idea of a European confederation, hitherto described as "the United States of Europe."

## WHY NOT USE THE LASH? ON THE NUDE FANATICS?

As a result of a fracas raised by Donkcheros in a colony near Nelson, B. C., 109 of them were sentenced to six months imprisonment with hard labor. This colony recently resorted to their old practice of divesting themselves of their clothing and marching in the nude to neighboring cities.

Since these fanatics voluntarily place themselves in excellent condition for receiving the lash it might be a good idea for the authorities to adopt this form of punishment in addition to the imprisonment. We have an idea it would have a greater effect than anything else.

## MINERS ASK CHANGES IN COMPENSATION ACT

A resolution demanding that a change be made in the Workmen's Compensation Act as at present written on the statute books of Alberta, was passed at the convention of the Mine Workers' Union of Canada held in Calgary this week. In an attempt to stabilize the industry by providing steadier employment and doing away with excessive production, the delegates voted in favor of a six-hour day and a five-day week.

Obtains a small office near Cameron street, Lethbridge, last Monday. The box is estimated at \$30,000.

## S. O. E. Wins Provincial Shield For Progress

For Best Average of Members And Progress Made

Members of the Sons of England turned out in full force last Tuesday evening to welcome the winning of the provincial shield presented by the Grand Lodge of Alberta for the best average of members and progress made, and also to welcome Bro. H J Cox as a Grand officer and receive his encouraging report as delegate to Grand Lodge.

About forty members were present as well as a number from Medicine Hat. In reviewing the progress of Grand Lodge, Bro Cox said the S O E held a very strong position in Canada today and it was to be appreciated very much because during the years 1914 to 1918 the Lodge had lost 50 per cent of its members during the war. He referred to Mayor Osborn of Calgary welcoming the delegates when he said that it was up to the men and women of today to carry on the work which was started in our towns and cities by men of English blood. Bro Nobis G S, congratulated Bro Cox on his report and Lodge Rosemere for the efforts the officers and members had made in winning the shield.

After the lodge closed a banquet was held. A toast to the King and the S O E was replied to by Bro. A Maskell. Songs were sung by Bros. Britt, Teater and Martin and were thoroughly enjoyed by all. The meeting closed with the national anthem and all went away feeling that they were greater than ever of being English, which fills an important part in the British Empire, and to be still living in this wonderful Canada of ours under the Union Jack.

Mrs. R S Hodge and Mrs W Campbell spent a few days in Calgary this week. Mrs. Aodge was consulting a specialist regarding her health.

## St. Ambrose W. A. Entertains Visitors

(Continued)

Thursday, September 12th, the members of St. Ambrose church W A had the pleasure of entertaining 11 ladies from the Medicine Hat branch also Rev. Cannon W. Western and Rev. Dixon, who visited with Rev. J. L. Cooper. Mrs. Nelson, Doreen, president, read the "twenty-eighth annual report of the Qu'Appelle Diocesan branch, held at Moose Jaw last June. After the reading Cannon Western presented Mrs. Cooper with the Diocesan Life Membership certificate, the badge being presented by Mrs. Nelson. Mrs. Farnsworth read a letter from the Diocesan president, Mrs. Prevett, expressing her pleasure at Mrs. Cooper being made a life member and took an affection from life members after many years of faithful work as Diocesan secretary to L. L. Holsen. The afternoon closed with a social cup of tea.

## Local Legion is Putting up a Radio

Tickets Will be Sold And The Lucky Number Wins The Radio

The Local Legion is now making preparations to hold a big carnival on Oct. 23rd and 24th. In the mean time, however, the committee in charge has secured a fine new Deforest Crosby Radio which they're putting up as a prize for the one who draws the lucky number. Tickets for this drawing have been issued and the committee will dispose of them at one each. This is a valuable prize and as the proceeds will be used for securing furniture for the new clubhouse every one in town should make sure to have a ticket. In addition to winning the Radio C T Hall is making a special offer to the winner. See the particulars in his ad.

## Here and There

1929. Canada has no more victims for every nine persons of reputation. A recent estimate of the aggregate amount of drugs, including the "domestic" at 1,000,000, only shows that the country is a heavy dealer in opium, cocaine, and other drugs. In fact, every 2.11 person in Canada is a victim of 2.11 persons, and is a victim of 2.11 persons.

The New England coroner got busy recently in a small town in Massachusetts when a recent mailer died anonymously in the matter of hotel of the Royal Hotel, Toronto, a package of spams, vegetables and dining room "sundries" borrowed some time previously. The writer, in returning the articles to the Manager, Maitland, the mailer said: "My conscience has been bothering me for several days since and have been unable to keep them any longer."

The Shoney Indians, Alberta, are said to be in "marching" mode, for while the section of the river on the north shore of the lake was seeking a forward, look in at the annual Indian pow-wow at head, four babies were born. Mother and child are all healthy and well.

Last year a man came into the C. P. R. ticket office on Sparks street, Lethbridge, for a ticket to Toronto where he had a job. He was five cents shy on his fare, but the collector gave him a ticket anyway. The other day a man in a suit and tie walked into the Sparks street office and said: "I owe you five cents on a ticket; how is it?"

Chief Stewart, Minister of the Interior, who has been visiting over the Rocky Mountains recently, announced that the last time he had been there will be augmented shortly by addition of preliminary study collected from the books at Wainwright and Killbuck.

Canadians are the world's greatest butter rollers. A recent compilation made by the Canadian Government shows that the total consumption of butter in this Dominion last year was 1,000,000 pounds of a per capita consumption for the year of 21.11 pounds, an increase of nearly half a pound per head on population compared with 1927.

## Public Meeting In Cliff Hall Next Monday Evening

Called For The Purpose of Trying To Get Skating Rink

A movement is now on foot to try to arrange for a skating rink here for this winter. At the council meeting last Monday the question was brought up and the council decided to see what could be done towards fitting up the old garage building on Third street for this purpose.

With this object in view a public meeting will be held in Cliff Hall next Monday evening, Sept. 16th, at 8 o'clock, when the matter will be thoroughly discussed.

There is great need for something of this nature in town and there is no doubt that with very little expense the objective could be accomplished. This is a matter in which parents and young people should be very much interested. For this reason Cliff Hall should be filled to overflowing for this meeting. The success of the venture will depend largely upon the enthusiasm of those concerned.

The Alberta Wheat Pool is drawing attention to the importance of delivering Post grain to Pool elevators whenever it is possible.

## Churches

ST. AMBROSE CHURCH  
Rev J. L. Cooper  
10th Sunday after Trinity, 15 Holy Communion at 8.  
Sunday School at 9.  
Matins and 8 o'clock 11.

Service at Terra Nova school at 2 p.m.  
Evening and sermon at 7:30  
Tuesday, Sept. 17th evening meeting at 8 p.m.

Thursday, Sept. 19th Sunday School teachers' meeting 7:30  
Friday, Sept. 20th children's choir practice after school, evening song 7:30, followed by choir.  
Saturday, Sept. 21st St. Matthew's Day.

The St. Ambrose Harvest Festival will be held Oct. 6th.

## GORDON MEMORIAL UNITED CHURCH

Rev. W. H. Smith, Pastor  
Rally Day Sept. 15th.  
R-stands for rally! we are getting together after vacation.  
A-That is All of us old, young, girls, boys, babies and grandparents.  
L-Little ones! the whole cradle roll of courses, Babies, kids, toddlers. The beginners and the primaries.

L-Longer ones! The juniors who are growing into by ind. The intermediates who will some day be as tall as their dads. The seniors, some of whom are as long as they ever will be.

Y-You! In one of these lists "You" are found.  
Sunday School will meet at 10:30 a.m. and will proceed to the church for the Rally Day program at 11:15. Special offering for Rally Day fund.

Evening worship at 7:30.  
CHURCH OF THE BAPTIST  
Rev. Mr. Mulligan, Minister.  
ST. MARY'S CHURCH  
Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

## Protection

YOUR valuables should be protected. A disastrous fire—a thief in the night—and in a few minutes the accumulation of years of effort is wiped out.

All our Branches maintain a Safety Deposit Department. For a very small annual rental your valuables are securely guarded within walls of masonry and steel.

## IMPERIAL BANK OF CANADA

REDCLIFF BRANCH

A. MCKENZIE

Manager.

## Fine Sport on French River

Expert anglers from Chicago, New York and other United States cities as well as Canada, are just now in the throes of the big fish contest at the French River Bungalow Camp which has been one of the major prizes of anglers on this continent for the past few years. To date the lead has been taken by a 30-lb. muskie, but there is still time to beat even this monster. A point of great interest to anglers is the fact that the Camp is on the main line of the Canadian Pacific Railway and is accordingly easily accessible to sportmen from the larger cities. In addition to fishing facilities of the highest kind there are also ample opportunities for canoeing for hundreds of miles west of the most scenic and lakes in the north, through country almost untraversed by white

## Protected Against Fruit Pests

Prohibits Imports From Infected Areas Of Florida

An order-in-council absolutely prohibits the importation into Canada of non-protected fruit or other plant products from the sections of the States of Florida, where infestations of the Mediterranean Fruit Fly have been found. Shipments of these products from all other parts of Florida entering Canada must be accompanied by a certificate of inspection signed by a duly authorized official of the United States Federal Department of Agriculture. This certificate must state that the contents of the shipment were grown in a non-infested area.

The Mediterranean Fruit Fly is an important enemy of citrus fruits and attacks other fruit crops and vegetables. The Dominion Entomologist of the Federal Department of Agriculture, is following the situation closely. The infestations of this fly in Florida during the past few months have caused more anxiety than any other insect, and already some amounting to nearly \$4,500,000, have been set aside for control purposes. All shipments of plants and plant products entering Canada from Florida are being closely watched by inspectors under the Restrictive Insect and Pest Act.

## England To Import Hay

But Saskatchewan Farmers May Have None To Sell

Saskatchewan's 1929 hay crop will find a ready market in England and Wales, according to intimations received by W. W. Waldron, market commissioner of the provincial government. Quoting from an article by Harrison Watson, based upon the hay crop outlook in England and Ireland, it was pointed out that poor crops had been realized there in 1927 and 1928, and there was an estimated shortage for 1929.

The article pointed out that the deficiency in the hay crop was made more serious by the fact that the reserve crop of hay had been entirely utilized. However, poor crop prospects for Saskatchewan point to the fact that the local hay crop will be required at home.

The first cut in the old country gave the farmers just half a crop, according to the report, and in the second crop it is estimated but 25 per cent of an average crop will be realized. The report states that it is certain that the United Kingdom will have to import large quantities of hay.

According to present conditions it appears that the Saskatchewan farmers will be unable to take advantage of this ready market for their produce.

## The British Empire

"The British Empire reports an effort to unite for a common purpose races which are scattered all over the world, whose peoples are different in color, in color and in traditions." Premier T. R. Bavin, of New South Wales said in addressing the Canadian Club at Vancouver. "It is an effort to combine two apparently inconsistent ideas," he continued, "the idea of perfect liberty, liberty united to a single Empire purpose for the good of the Empire and the world."

## Will Attempt To Salvage Bullion

An attempt will be made to salvage the \$5,000,000 in bullion sent out of France, in the liner Egypt during the World War. An Italian company which saved the Belgian ship "Elsbeth," also a victim, will have charge. The latest German diving outfit, which was driven to work for several hours at 500 fathoms, will be used.

Cut flowers set in a drift will soon wilt.

"Don't you speak to Smith now? You greeted him very cordially."

"It is he who is cold with me ever since I borrowed \$200 from him."

—Montague, Charlton.

W. N. U. 1797

## Alligators Alarm Bathers

Two Five Foot Sauroians At Large In The Ottawa River

Linn Park, the "Little Sandusky" at Ottawa, has been called off on account of alligators.

The park imported ten alligators from the swamps of Florida, and while they were being unloaded at the aquarium in the park, two five-foot sauroians got away and slipped into the Ottawa River.

Bathers who stroll by the river in the moonlight have been warned not to ask the girl friend to sit on a log and watch the moon. The log may open up and chew off a leg.

When the alligators arrived at the park they were all muzzled. The park attendants had never before been called to act as valets to an alligator and so transferred them to the tank by grabbing a tail and swinging them out.

One wise alligator about 30 years old got some of his trick teeth to work and chewed off his muzzle. Then he chewed his way out of the tank and ended up by chewing a leg off another.

Joe Charlebois who was conducting the personally conducted trip of the alligators had switched five into the tank and was returning for the sixth when he found two of them at large and in open defiance of Joe. Joe backed off. His instructions had been to keep them by the other end but he couldn't reach it.

Joe went into executive session with himself. The alligators were not killed but they were at him in the alligator language. They hissed at him. Joe backed up.

Then he closed the tank door and ended up by chewing a leg off another.

## Farmer Knows No Hears

Has To Stay On Job Until Work Is Finished

In his thirteenth on the farmer's independent existence, published recently in the "Dairymen's League" magazine, the author, Mr. R. H. Lyle, plays fast and loose with syllogisms. "Farming provides a man with a steady job," he says "he has all he can do right at home." But read two sentences further. "He is master of his own house," he says, "but he shall get up and what time he shall quit."

What an impatient world demands to know he is sound the alarm without relinquishing the mastery of time. The deckhand on the submarine, the designer of hotboxes, the farmer has to bring considerable leisure. But if the farmer quips before the cows are milked and the stock fed, he is well—no farmer!

The glowing paragon cited uncovers a new method of making a new elastic system of accounting that has suddenly transferred the farmer's life into one of suspense. Suppose, for example, that at the close of the year a farmer finds that his income has been \$5,000 and his business expenses have been \$4,000. He is completely cast down to discover that he has lost an entire year for \$1,000.

According to the latest discoveries of scientific management, however, it is now recommended that he add to his income an arbitrary figure for aesthetic satisfaction. Add \$5,000 worth of aesthetic satisfaction to \$5,000 income, and the income is \$10,000, showing a fine net profit of \$5,000. That would make farming seem worth while.

## Has Best Of Precedents

The minister who in seeking a larger attendance at his church during the spring and summer season, promised that his sermons would be so short that the entire morning service would last only one hour, may have shocked some of the more conservative members of his parish. But he has the best of precedents. The "sermon on the Mount" can be read easily in much less than half an hour.

## Add To Population

What is said to be the largest household ever to move into Canada, arrived at Quebec in the person of 78 people by the name of Anderson, all related. The oldest member is 80 years of age and the youngest three. Twelve distinct families make up the group which comes from Switzerland. All were found for Western Canada.

## Low Buys Barbs In China

Bus owners of Harbin, China, have adopted modern methods by combining the bus and the association now controls 110 vehicles and pays the city an annual tax of more than \$100,000. The bus owners have been found in two to five cents, according to the distance, within city limits.

## Eighty-four and Eight

Wm. Chubb, 84 Years of Age and a Friend in David Wright, 8 Years Old, on His Trip on Canadian Pacific Steamer "Maita"

Wm. Chubb, 84 years of age and a friend in David Wright, 8 years old, on his trip on Canadian Pacific steamer "Maita" from Montreal to Glasgow, Mr. Chubb lives at Essex, Ont., and was on a visit to his son in England. David Wright, travelled alone from Alberta to Scotland and was tagged by the Canadian Pacific Railway, in whose cars he was placed, to his destination. It was hard to say which of the two boys enjoyed the voyage the most.

## Tributes To Doctors

Medical Fraternity Making Sacrifices For Good Of Mankind

Probably no professional men work harder or longer to acquire new knowledge than physicians. They are always at work, they are always exchanging discoveries, if not at conventions then through professional journals. The happy "hit" of one doctor becomes at once public property, available to the hand of every colleague. They do not patent their inventions and mint the surfeits of mankind into cash. They are sentinels always on the watch and always eager to sound the alarm when a foe approaches, or when an enemy can be beaten back.—Montreal Star.

## More Information Needed

A sorrowful office of works has advised citizens how to catch a pelican which winged away from St. Patrick's Park. "It will be quite helpful if needed by the bill of a pelican of a pelican that refuses to be tempted from its roost."

## THE CELEBRATED BAD BABY

The man with the pail is mightier than the man who gets pulled.

No. 15, The Bad Baby—112 yards, Par. 3.

There is no place to go here except the green. Everywhere else spells trouble with a capital "T" While it is the shortest hole on the Jasper Park Golf Course, it is one of the hardest, and many a hope for high scores is sure to be broken here during the Canadian Amateur and Western Canadian Amateur Championships, which will be played August 19-24, and the Silver Tatum Golf Tournament, September 7-14. The tee, fairway and green are all shown in the upper photograph and below is a sketch in scale, showing the hole in detail.

## What's In A Name

Shakespeare To The Contrary It Sometimes Means A Lot

The citizens of the ancient town of Treadwell, in Norway, are up in arms against a proposal to change the name of the place to Nidaros, under which it was known during the Middle Ages. Ninety per cent of the populace is opposed to the proposed substitution, and the municipal council has sent a protest to the National Assembly voicing their attitude and threatening to refuse to change it, if it is made over their protest.

The old problem is again involved: "What's in a name?" Well, there is a good deal more in a name, if we may believe some expert witnesses, than Shakespeare thought. While it is true that a rose by any other name would smell as sweet, it is also indubitably correct that if roses were advertised as onions at \$2 a dozen, there would be a strictly limited sale of them. Still, the passion for changing names persists, and it is by no means confined to places. Publishers in the United States seem to find it well-nigh impossible to contemplate the publication of a novel from the other side unless they change the name. Their argument is a name that intrigues the public curiosity is much more likely to sell a book than any other name.

In Canada we have instances of the names having been changed, and the change does not seem to have done any harm. But it should surely be left to the particular community involved to decide whether they shall continue to be known as citizens of Roseton or Onlonville. They are the people who will be affected by any change, who will inevitably be put to inconvenience through the mails and other ways for some considerable period. It is inconceivable that a whole nation should be interested in the change of one town's name.—Montreal Star.

## Names Placed After Fliers

Canada honored and commemorated the names of the first two men to accomplish a non-stop flight across the Atlantic, when Brig-Gen. A. H. Bell, Officer Commanding Military District No. 2, Ottawa, christened two Royal Canadian Air Force "Bislin" pursuit planes at Camp Borden, naming them the Sir John A. Macdonald and the Sir Arthur Wilfrid Brown.

## New Canning Plant

The new dehydration and canning plant of Bulman's Limited, in nearing completion at Vernon, B.C. It is a fine modern in the treatment of fruits and vegetables and will have a maximum capacity of from 35 to 40 tons per day. One hundred and fifty employees will be needed when the new plant begins operation probably early in August.

## Leather Dressing was One of the Most Important Trades Among the Ancient Egyptians, and at Thebes, in the days of Egypt's glory, a special carter was the man set apart for the tanners.

## Fleshy Annual Pastures

Found Very Satisfactory For Sheep, Swine and Cattle

The principal use of fleshy annual pastures in Canada, such as, rape, kale and cabbage, as yet, is as a pasture. If this capacity they have been found quite satisfactory for sheep, swine and cattle, principally young cattle or fattening steers. Grown in poultry runs, these crops could give a satisfactory free-range food for most kinds of poultry.

It is claimed that animals pasturing on rape require a greater amount of salt than usual, and that this should be freely supplied. In the instance of cattle and sheep there appears to be some danger of bloating unless precaution is exercised to prevent this. Growers of these crops claim that if the animals are not allowed to begin when hungry, especially when the plants are wet with dew or rain or frost, that bloating may be entirely avoided.

Once accustomed to eating these crops the danger of bloating exists. According to the pamphlet No. 72, "Fleshy Annual Pastures in Canada," available from the Publications Branch of the Department of Agriculture, Ottawa, instead of being utilized as a pasture the fleshy annuals under consideration may be used as a source of food for the same types of animals. Dairy cows may also be included in this category of milking purposes, but good judgment must be exercised as to the time of feeding if undesirable odors are not to affect the quality of the milk.

Any of the three crops are also greatly relished by poultry and could be grown on a wide variety of soil in the poultry-pasture.

Because of the fact that the varieties of both rape and kale may be planted quite early in the spring, they are frequently recommended as aids in eradicating weeds. The land to be cleaned may be ploughed early and cultivated until the latter part of June which in itself is sufficient to destroy the large number of weeds. Either rape or kale may then be sown, and as they soon cover the ground, further growth of weeds will be largely prevented by shading.

## Body Lice In Fowl

Routly Controlled By The Use Of Powder Which May Be Easily Obtained

Body lice in fowl are very readily controlled by the use of lice powders of which there are many on the market. These are dusted into the fluff and underneath the wings, or mercurial ointment, commonly known as blue ointment, is very convenient to use. A piece about the size of a small pea is rubbed beneath the wings and underneath the feet. Examine the fowl for local droppings, which you wish to use the ointment for and he will make it the proper strength. This ointment should not be used on setting hens, as it will destroy the germs in the eggs.

Mr. George Robertson, in Circular No. 10, "How to Rid a Fowl of Lice or Mites," available at the Publications Branch, Department of Agriculture, Ottawa, says, of all the many varieties of vermin that infest fowl, Red Mites are the most troublesome. Unlike the ordinary hen house, they are not as a rule, found on the fowl, neither are they killed by dusting, as the ordinary body louse is. These pests breed very rapidly, especially during the hot weather, usually in cracks containing filth or in dirty nesting material. They are not red in colour as is popularly supposed, but grey; it is only after they have come into contact with the feet and have become filled with blood that they appear red.

The young mites are white and have only six legs, but after casting their skins, they have eight legs. They are able to live and reproduce for months without animal food, the first food of the young probably being dirt or decayed wood. They thrive best in dark, dirty houses and have been found to exist in houses the following season after the fowl have been removed.

The circular gives the particulars as to the control of mites and the best disinfectants to use.

## Lucky Taxi Driver

Andy Williams, taxi driver at Picton, Ontario, was paid \$100 by an American tourist for a 50 cent ride. The man did two friends arrived at Picton on a big yacht. They wanted to find the post office. The fare was 50 cents. "He handed me a \$100 bill," William relates, "I said I could not change that. 'Oh, that's all right,' he said. 'Take it and take a holiday.'"

## The Sale of Inflammable X-ray

Is now prohibited in New York State.

## Nothing To Show

Elderly Clerk: "I don't like this new fashion of the young men going without hats."

Friend: "Why not?"

Clerk: In the days of long ago, when the chief wanted somebody who was not in the office, one would say: "He must be about—there is big hat; but now there is nothing to show."

## Telegraph Service For North

The tentacles of civilization are reaching into the northland. The department of public works is now tender for the clearing of a right-of-way for a telegraph line from Inland Hill to the A. C. Cross. These places are in the far north of Saskatchewan, miles beyond ordinary civilization.

"And I came here because they said the water was good for rheumatism."—Gutteridge, Madrid.

## WORLD HAPPENINGS — BRIEFLY TOLD —

Lady Jane Merton, mother of Lady Byng, died at Brighton, England, very suddenly at the age of 88 years. She was the widow of Sir Richard Merton, son of the Earl of Derby, who died in March, 1927.

William Johnson, a powder monkey when the last war broke out in the Crimea War, and a witness of the last hanging for naval intelligence, died recently at Weymouth, England, aged 85.

The British Admiralty has announced promotion of Admiral Sir Edmund Dore to be Admiral of the Fleet, to fill the vacancy caused by transfer of Admiral Sir Charles Madden to the supplementary list.

Concealed among the ship's paint supplies, which are stored in the forepeak, 108 tons of opium valued at \$10,800 were seized by customs examiners on board the "Empress of Asia," of the Vancouver-Orient Service. No arrests were made.

A sale of 60 tons of cattle by R. H. Bull and Son, at their farm near Brampton, Ont., brought total receipts of \$80,224. It is said that this was the largest of cattle ever held in Canada and the average price of \$1,293 has never been equalled on the continent since 1909.

Official circles have intimated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building suspensions announced by Premier Ramsey MacDonald, of Great Britain, and President Hoover of the United States.

Seth B. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eighty times the magnetic intensity of ordinary sun spots, Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

### A Master Scientist

Dean Boyle, Of Alberta University, Accepts Post On Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its staff scientists of the calibre of Dr. H. W. Boyle, M.A., Ph.D., Dean of the faculties of physics and applied science at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 40 years of age, is already one of Canada's foremost scientists, ranking not far behind Professor J. C. McLennan, of the University of Toronto. During the war he showed that he was no mere theoretician in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has also been turned to devices for the detection of icebergs. He appears one of Canada's master scientists and it is fortunate that his services are now to be made available for Canada as a whole. The University of Alberta has now given two of its staff to the National Research Council. Dr. H. W. Boyle, chairman of the council, is a former president of that institution.

### Honey Extraction Plant

The latest machinery being installed in the new apiary to the plant of the Riedel Honey Company, at Taber, Alberta, and prospects appear to be first class. The new addition will be for honey extraction and a daily output of about 9,000 pounds is expected during the active season.

### Sheep Shearing in Alberta

Sheep shearing in the Picture House District, Alberta, is now about finished. Last year there were only five flocks in the district; this year there is 25, making a ranging in size from 25 to 350 ewes.

## Want Night Air Service

Demand From Hamburg, Germany, To Be Included In Present Plans

Hamburg, Germany, is demanding that it be included in the present plans for night flying services that are to cover all Europe. The promoters of the service say that the favorable position of the city with its day services does not necessitate its having a place in nocturnal flights. White Hamburg authorities admit this they contend that the great importance of their city as a commercial center demands that it should be included. They point out that Hamburg is the junction for air service from Scandinavian countries and it should at least have night service connection with Berlin and Rhine via Bremen to enable passengers arriving late in the day to continue their journey.

## Church Collections Suffer

Using Big Nickels Instead Of Quarters In Offerings At Ottawa

Governments have been blamed for troubles a plenty, but Canada's law-makers are cited as the cause of numerous decreases in church collections. The latest trouble laid at the door of the Dominion Government, and an Ottawa churchman has made the charge.

With the advent of the "big nickel," church collections have fallen off, a preacher stated today at a regular Sunday service. "The large five-cent pieces," he said, "are dropped into the collection plate as a result of a law that belongs to nothing less than a quarter. I don't blame the smaller collections on the people, I blame the Government."

## Winnipeg Newspaper Union

Journalists' Association

The Winnipeg Newspaper Union, which is a union of journalists, has been organized. The union is a result of the publication of this article, which incidentally drew comments in British and American as well as Canadian papers, private parties have set on foot plans for complete exploration of this deposit. Last week another article in this paper told of various indications of precious stones in the north and even suggested the possibility of diamonds being found.

Gold and silver are now commonplace in our northern picture and platinum is becoming almost familiar to our mining men. Iron ore in vast quantities exists in Ungava and on the islands of Hudson Bay and elsewhere. In the north, there are northern clays. Copper deposits are known to exist in Northern Saskatchewan and run into the Arctic Circle and elsewhere have been mined upon the surface of lakes in the far north to find nickel and other base metals.

The north is an amazing country in future wealth. Canada can no longer be regarded as a narrow strip 3,600 miles long. It is a vast country approximately 3,000 miles square, with as much prairie in the far north as at the east and the west— Moose Jaw Times.

## DIAPHRAGM

A new silhouette for the youthful smart woman. It shows the raised waistline, a chic detail in all Paris frocks. The circular skirt in diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 666 combines perfect and plain cotton voile, the popular summer fabric. It comes in sizes 36, 38, 40, 42, 44 and 46 inches bust. The deep slender neckline makes suitable for the larger woman, by placing the chignon, tamaris red crepe de chine, yellow handkerchief linen, orchid and white printed lawn. Purple aster georgette crepe, printed rajah in blue and white, and shirley shirley lace are distinctly smart combinations for this charming afternoon model. Pattern price 25 cents in stamps or cash (coin is preferred). Wrap coin carefully.

## How To Order Patterns

Address: Winnipeg Newspaper Union, 375 McDermott Ave., Winnipeg

Pattern No. .... Size .....

Name .....

Town .....

Remember: Harvester Inventor.

A memorial stone is to be placed on the site of the building where the first successful twice blading grain harvester was produced at Beloit, Wisconsin.

## HIGHLY PRIZED TROPHY

Is the Beatty Trophy, presented by the chairman and president of the Canadian Pacific Railway, for inter-regional competition among pipers of Canadian Highland Regiments, to be played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 2. The gathering brings together pipers from one end of Canada to the other, from Nova Scotia to British Columbia, and is the great event of the year in Scottish-Canadian circles.

## Riches Of Northland

Vast Treasure House Of Precious Minerals In Northern Canada

Llewellyn W. C. Cain, Deputy Minister of Lands and Forests of Ontario, who has been visiting northern Ontario all his life and is an enthusiast for that country, stated that in his recent trip to the far north he was given a picture of northern possibilities that was beyond his previous ideas on the subject. Some time ago "The Financial Post" told of the existence of a vast deposit of nickel in the north of Northern Manitoba. Already as a result of the publication of this article, which incidentally drew comments in British and American as well as Canadian papers, private parties have set on foot plans for complete exploration of this deposit. Last week another article in this paper told of various indications of precious stones in the north and even suggested the possibility of diamonds being found.

Gold and silver are now commonplace in our northern picture and platinum is becoming almost familiar to our mining men. Iron ore in vast quantities exists in Ungava and on the islands of Hudson Bay and elsewhere. In the north, there are northern clays. Copper deposits are known to exist in Northern Saskatchewan and run into the Arctic Circle and elsewhere have been mined upon the surface of lakes in the far north to find nickel and other base metals.

## Recipes For This Week

(By Betty Barclay)

### PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water. When tender, peel the skins and rub through a colander. Mix together one teaspoon salt, one egg, and one tablespoon of butter to the parsnips. Mix two tablespoons of butter in a saucepan, stirring in two tablespoons of flour and one cup of milk. Be sure the mixture is thick and smooth. Add the parsnip mixture and let it bubble for five minutes. Bake in a buttered baking dish and bake for 35 minutes in a moderate oven. Serve immediately, or the souffle will fall.

### PINEAPPLE PUNCH

1 quart water.  
2 cups sugar.  
2 cups chopped pineapple.  
1 cup orange juice.  
1 cup lemon juice.  
Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool, strain and dilute with cold water if necessary. Either fresh or canned pineapple may be used.

### Saskatchewan Farm Loans

Since the Farm Loans board was inaugurated in 1917, more than 4,500 farmers throughout the province of Saskatchewan had received assistance by way of loans from the board to December 31, 1928, according to the Department of the treasury of that province. From the inception of the scheme to that date a total of \$18,000,000 had been loaned to farmers.

Since 1918 3,250,000 houses have been built in England, providing homes for five or six million people.

## Ask Daylight Saving Act For Dominion

Move Being Made By City Council Of Stratford, Ontario

In reply to a resolution from the city council of Stratford, Ont., in which the local council was requested to petition the Dominion Government to pass legislation to which summer time will be made effective throughout Canada, special council instructed the city clerk, George Beach, to obtain information as to whether Stratford is asking for daylight saving time for the summer months only or all the year round.

In the communication received, it was pointed out, by the Stratford council that the Dominion Government had already been approached and petitioned by the former body. The Regina aldermen are in favor of Dominion-wide daylight saving time being established for the summer months, but are opposed to it being effective all the year round.

## Drought Conditions In Argentine

Dry Weather Causing Anxiety Times For Farmers

Argentine farmers are not the only ones who are experiencing anxious times in connection with the prolonged spell of dry weather, according to reports received by the department of trade and commerce, Canada's chief competitor in the world wheat market, Argentina has also been experiencing a prolonged drought and much anxiety is felt by the grain and cattle trades. Not only is pasture in that country threatened, but the work of plowing and sowing for next year's major crops is held back by the hard state of the soil. In addition, wheat prices are below normal remunerative prices to the farmers.

In the United Kingdom the ministry of agriculture reported on July 1 that continued weather conditions were adversely affecting the cereal and root crops. Wheat, barley and oats were estimated to be five per cent. below the average, and bean crops per cent. below average. Potatoes were backward, and unless great rains were received, will be under average. What is known as "Great Britain as 'corn crops' appeared to be fairly healthy on the average. Also was promised an average crop.

## New Zealand Must

Conserve Its Timber

Government Has Plan To Reforest Three Hundred Thousand Acres

Need for conservation of the British Empire's timber, not only in the great forests of Canada, but also in New Zealand, is emphasized in the statement of Hon. W. B. Taverne, administrator of state forests, that in forty years there will be no native timber worth having in New Zealand left to mill.

Mr. Taverne recommends that the Dominion proceed at once with an extensive planting program. "A certain change of attitude is required toward the use of timber in New Zealand," said the minister. "The forests have been wasteful in the utilization of native timbers, and that waste must be stopped. In the most favored forest districts my experts tell me that only about ten per cent of the standing timber is actually utilized in the manufacturing of lumber."

The government is going ahead with a program for the provision of 300,000 acres of state forest to be planted in pine trees. On some of the land to be reforested the government will plant fir cones and other tree seeds obtained from British Columbia.

## Prince Is Expert Typist

The Prince of Wales has been revealed as an expert typist. On a recent trip to the north of England, he carried a typewriter with him, balancing it on his knees in the train and setting down his impressions of the journey.

## Canada And The British Market

Quantity Shipments of Farm Produce Just as Necessary as Quality Standard to Bring in Trade

In a very instructive article that has been published by the Country Goods of Winnipeg, W. A. Wilson, Canadian Agricultural Products representative on the Empire Marketing Board, brings out some of the reasons why Canada is not getting a larger share of the British foodstuffs market. One point that he brings out is of very great interest; it is that quality itself is not sufficient to win the British market; there must be quantity as well.

What Mr. Wilson means is that sales contacts cannot be established and maintained in Great Britain unless there is assurance of an adequate and steady supply of the commodity sought to be bought, eggs, meat, salmon, or other foods. This is the lesson that Canada has not learned, Mr. Wilson indicates. The quality of our food products is very thoroughly satisfactory to the British consumer, but we do not provide a steady supply of our goods. British buyers are very chary of shifting their sources of supply unless they are given every assurance that they can always get what they want when they want it.

## Mr. Wilson Believes that Canada,

in improving the quality of some of its products, has the ability to win leadership and workers. He considers it quite as reasonable to assume that Canada can work out the problems of quality production that is necessary to hold the British market.

To judge from the article one would assume that all that is necessary to overcome Canada's handicap in the British market is to have Canadian farmer and farm organizations. If the problem does not go deeper than that, it will be difficult to solve. The Department of Agriculture at Ottawa and in each of the provinces and the various provincial organizations have tremendous opportunity to aid in expanding Canada's export trade.

## Made-In-Canada Exhibition

Will Show Public Quality Of Goods Produced In Dominion

Co-operation of various bodies with the National Produce-Show-Exhibition, which will be held in Montreal from November 4 to 9, has been secured. The exhibition reports received by the Canadian Manufacturers' Association, Quebec division, Montreal branch, "These reports," says the Gazette, "show the consensus of opinion strongly supporting the scheme to illustrate to the public, through the medium of the exhibition, the quality and diversity of goods which are produced in Canada by Canadian manufacturers or producers."

## WINDOLITE

MADE IN ENGLAND

### The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, and a stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of health and vitality, the most effective means of the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays. That by using glass we are actually excluding these vital life-giving rays. Therefore the invention of WINDOLITE has completely satisfied the demand for a glass substitute that has been conclusively proved that it is a most effective health-giving substance. It admits the Ultra-Violet rays, and that it has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy milk and butter and darkness in their sheds.

Indeed, the discovery of WINDOLITE during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is easy to fit. WINDOLITE is supplied in rolls any length but in units of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs no less than 120 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, Excl. Tax, Toronto.

Use WINDOLITE and let YOUR PLANTS and YOUR CHICKENS and YOUR CATTLE Bask in the sunlight. Send for booklet "WINDOLITE"

## The Pyramids of the Prairies

The Pyramids of Egypt were built for the glory of ruling dynasties by piling myriads of slaves and with wealth wrung from hardy tax-paying citizens, generations after generations of desperate toil with primitive tools built these gigantic monuments, the pride of a racing class.

The Wheat Pool farmers of Western Canada are building an entirely new and valuable monument—a great system of elevators owned by themselves and operated for their protection and benefit. By means of an annual contribution of two cents for each bushel of wheat the Pool members of Alberta have provided over \$2,000,000 dollars for the construction of their elevator facilities. Bound together by the ties of co-operation, these Pool farmers are working out a plan for their own economic freedom.

The clear-sighted, far-seeing Pool member is extremely loyal to his own elevator system, realizing its value. Not only are Pool elevators operated for the Pool membership at low cost, but they provide a strong shield to guard the welfare of the producer.
